Team Mini Social Project: Care for The Carers - Section 1 Group 8

Group Members:

Thái Thảo Linh - V202502481

Dương Khánh Hà - VU2611131

Nguyễn Quang Khánh - VU2611349

Phạm Khánh Ngọc - VU2611129

Ethan Raine Montellano Abad - VU2611660

Submission date: 11/01/2026

Part 1: Final Product Submission

Group Report Website Submission

Care for the Carers: https://careforcarers.vercel.app/Bizethics/web.html

Each team will identify a real-world, local ethical issue and set up a project to reduce the impact of the problem, a challenge-based learning task requiring students to engage directly with an authentic, unresolved community problem. The project emphasizes design thinking, creativity and social innovation.

Summary of Content Included, please view the Website first:

1. The Host Website ⚠️ ***(Everything is already INCLUDED in the website)***: ⚠️

- Website

Landing page reporting related numbers, The Carers' Journal with Free Monthly Subscription, Donation Hub, Personalized Interactive Hall, Documentary Video and Posters, Financial Statement.

- Flowers for mothers: 600,000 đ *(Last Update: 11/01/2026)*

Part 2: AI Log Declaration

No.	Date	Project / Task	Link to chat	Prompts/ Outcome/ Rejection	AI Model

1	Oct 22	Initial Website Building By Hà Dương And Website development by Thảo Linh	https://claude.ai/share/2203512c-c1d7-4773-9f9c-a8084e96036a https://claude.ai/artifact/3kni7xBCNKN9bqcfUGgjg7 https://claude.ai/share/2203512c-c1d7-4773-9f9c-a8084e96036a	Summary: We have to manually give Claude our ideas and our own input of all the contents from writing to media or connecting it to Database collector for automatic email sending. It returns mostly perfect results but sometimes manual work requires sufficient time regarding publishing the website and data collection. However it ends up working very nicely.	Claude
2	24–26 Oct 2026	Executive Summary - Drafting and refining the summary	https://chatgpt.com/share/6ae76306-c060-83ec-b886-6a7894e122f5	Prompt**:** I asked ChatGPT to polish the executive summary that I had drafted based on the group's project information, objectives, ethical frameworks, activities, and results. =>Outcome**:** It accepted language and structural suggestions to make the writing more formal. =>Modification**:** Reviewed and adjusted the suggested wording to ensure it accurately reflected the project's activities and outcomes.=> Rejection**:** It did not adopt any suggestions that could imply unverified website donations, direct financial payments to mothers and many more	
3	17 Oct - Now	Social Media Planning		Eg: Can you create a version of this but for mothers, 10 ways to make your mom feel appreciated, also make a catchy phrase for that => It gave back recommendations of the contents based on the ideas => Some use this for the visual of the posts on instagram and tiktok	Chat GPT
4	Oct 12-Now	Meeting agenda Planning and Logical Ideation for Communication.	https://claude.ai/share/f61205e5-8e1f-4d56-8995-2e66bce86108	Based on the assessment grading and the brief to finalize the proposal and what we can do as university students within two weeks to make this project a surprise to everyone (the outline only but more detailed) and possibly recommendations of impactful previous case studies. Rewrite this announcement to be more logical for people to understand. Find related papers to these ideas that are open for public access.	Claude

5	Oct 31	Checking the translator for the video and fastening the subtitle matching.		Automatically generate subtitles for this video based on the actual content for me => CapCut will run through all the videos and come back with Vietnamese subtitles. Then manually furnished it into English to be more natural since this is just a Beta and it can only translate word by word, not the entire meaning of the context.	CapCut Agents

The End.

Thank you, from Team 8.
